

The Solution Manager Health Check by abat

Do you have an SAP Solution Manager system but don't use it?

- You are not yet aware of the possibilities for optimal use of e.g. Change Management or Focused Build? Or do you encounter ambiguities in the configuration of the system?
- No one can answer your questions about the status of Solution Manager and its functions?

What is the benefit of a Solution Manager Health Check?

- You know the status and health of the system.
- You can develop a plan for how and when to use the system.

The abat Solution Manager Health Check

Health Check through our expertise

- Experts check your system for stable installation and basic configuration.
- Potential for improvement and/or need for action are identified.
- Analysis results are documented in detail

” With Solution Manager we no longer have any problems with our transports.

(Dirk Bäcker, Josera GmbH)

abat is one of the leading SAP service providers for the automotive and manufacturing industries in Germany.

The abat Solution Manager Health Check combines our knowledge of existing SAP systems with our experience and tools from numerous Solution Manager projects.

This is how we proceed:

- Expert analysis of the system or system landscape
- Workshop on the company's history and goals with Solution Manager
- Tool-based review using reports
- Evaluation of the results and derivation of implementation steps by the abat expert network

We deliver the results:

- Detailed and written analysis results including expert evaluation and derivation of next steps
- Detailed implementation planning
- Possible innovation potentials in the area of Solution Manager, especially for the analyzed company and its processes within the feasible range.
