

LE-TRA Road to TM – Switch to SAP TM Basic or Advanced with the best strategy

The LE-TRA countdown is running: How do you find the best SAP TM solution?

SAP has stopped supporting LE-TRA for 2030, which means that many companies need to switch to a transportation management system that will work in the future. SAP Transportation Management (TM) offers a strong and reliable platform for this. Deciding between SAP TM Basic and SAP TM Advanced is not an easy choice. If the solution is too big, it can cost more money to buy and set up. If it is too small, it might not meet the business's needs, which could lead to problems down the road.

Your added value at a glance

- Cost and risk optimization: Make the optimal choice between SAP TM Basic and Advanced.
- Transparency about functionalities: Gain clarity about the coverage of your requirements by the respective TM variants.
- Tailored strategy: Develop an SAP TM roadmap tailored to your customer requirements.
- Expert feedback: Benefit from our experience in evaluating and implementing SAP TM solutions.

abat is one of the leading SAP TM service providers in Germany. With the SMARTsolution LE-TRA Road to TM, our TM experts will analyze and assess your logistics processes. The result is a transparent evaluation of your requirements and well-founded recommendations for choosing the right TM variant, as well as an approach for your LE-TRA replacement.

This is how we proceed:

- Initial meeting with a brief presentation of our approach and clarification of your requirements
- Interactive workshop to analyze the current situation and map functions
- Creation of the evaluation matrix
- Analysis of the evaluation matrix and development of a recommendation for SAP TM Basic or Advanced

We deliver these results:

- A detailed evaluation and requirements matrix that clearly shows how SAP TM Basic and Advanced cover your logistics requirements
- A well-founded recommendation on which SAP TM variant (Basic or Advanced) best suits your business requirements and cost calculations
- An initial roadmap for the further planning and implementation of your SAP TM solution
