

## abat Starter Package SAP Signavio Process Insights

### Unleash your innovation potential

SAP Signavio Process Insights provides detailed insights into your SAP core processes, offering real data from your SAP system in the shortest possible time. Examine a selected end-to-end process for deficiencies. SAP Signavio Process Insights provides data-based support for your decision-making process and helps you seamlessly monitor and continuously improve your processes.

### SAP Signavio Process Insights offers

- 220+ actionable recommendations and 890+ innovations for process anomalies, e.g. as a basis for a stringent project approach for your S/4HANA conversion.
- Identify and optimize inefficient process steps in your SAP system.

### The abat starter package for SAP Signavio Process Insights

- You will understand how the software works and how it can be used.
- You will get a clear overview of the examined process and possible optimization potentials.
- Initial benchmarking and weak point analysis of the selected process.

abat AG is one of the leading SAP service providers for the automotive and manufacturing industries in Germany. The abat starter package, SAP Signavio Process Insights, supports the structuring and evaluation of innovation opportunities. Our extensive experience in a variety of industry sectors is a significant advantage.

### This is how we will proceed:

- First, we will implement an initial workshop to identify suitable fields of action.
- We will give you a detailed analysis of the jointly selected process.
- We will then create a list of recommendations for corrections and innovations.

### We deliver these results:

- We establish a future-proof standard for optimizing critical business processes.
- Enable your employees to quickly start using SAP Signavio Process Insights.
- We provide an appropriate roadmap for innovation projects to improve analyzed processes.
