## SAP Logistics

# Optimize the supply chain with SAP

The logistics sector is under high cost and efficiency pressure. Products and goods must be supplied to the right place at the agreed time, and at the lowest possible cost. This requires operations to run smoothly. SAP solutions for the optimization of the supply chain facilitate this. These include Warehouse Management and Extended Warehouse Management (SAP WM and EWM), Transport Management (SAP TM) and Service Parts Management (SAP SPM).

## The applications enable

- optimized end-to-end operation support
- considerably improved process support and automation
- higher stock and process transparency
- quick configuration using process examples and wizards
- easier integration into existing IT environments

## Comprehensive service offering - from strategy to support

The abat Group and its specialized units support you in detailed conception and implementation.

## abat consultants

- develop deployment strategies, customer-specific SAP processes as well as IT architecture for all sectors
- develop roadmap and template approaches for a fast and smooth implementation and go-live
- offer application management
- adhere to budgets and schedules on the basis of solid project and program management

abat is a RampUp Partner of SAP TM and was one of four Special Expertise Partners of SAP for “logistics services” in Germany.

abat’s customers include Deutsche Post Worldnet, DHL, Hermes and Schnellecke as well as Daimler, Volkswagen and Audi.

## We offer you these solutions

### ■ **SAP Extended Warehouse Management (EWM)**

EWM can map simple as well as highly complex warehouses, model intermediate steps in goods putaway and picking and display stocks and processes transparently at any time. The integrated material flow control allows the control of different automatic warehouse types.

### ■ **SAP Transport Management (TM)**

The SAP TM module and the planned further developments are a major step towards covering the entire international transport chain. As a Ramp-Up-Partner, abat has been involved in the new conception of SAP TM and forwards these experiences to its customers.

### ■ **SAP Service Parts Management (SPM)**

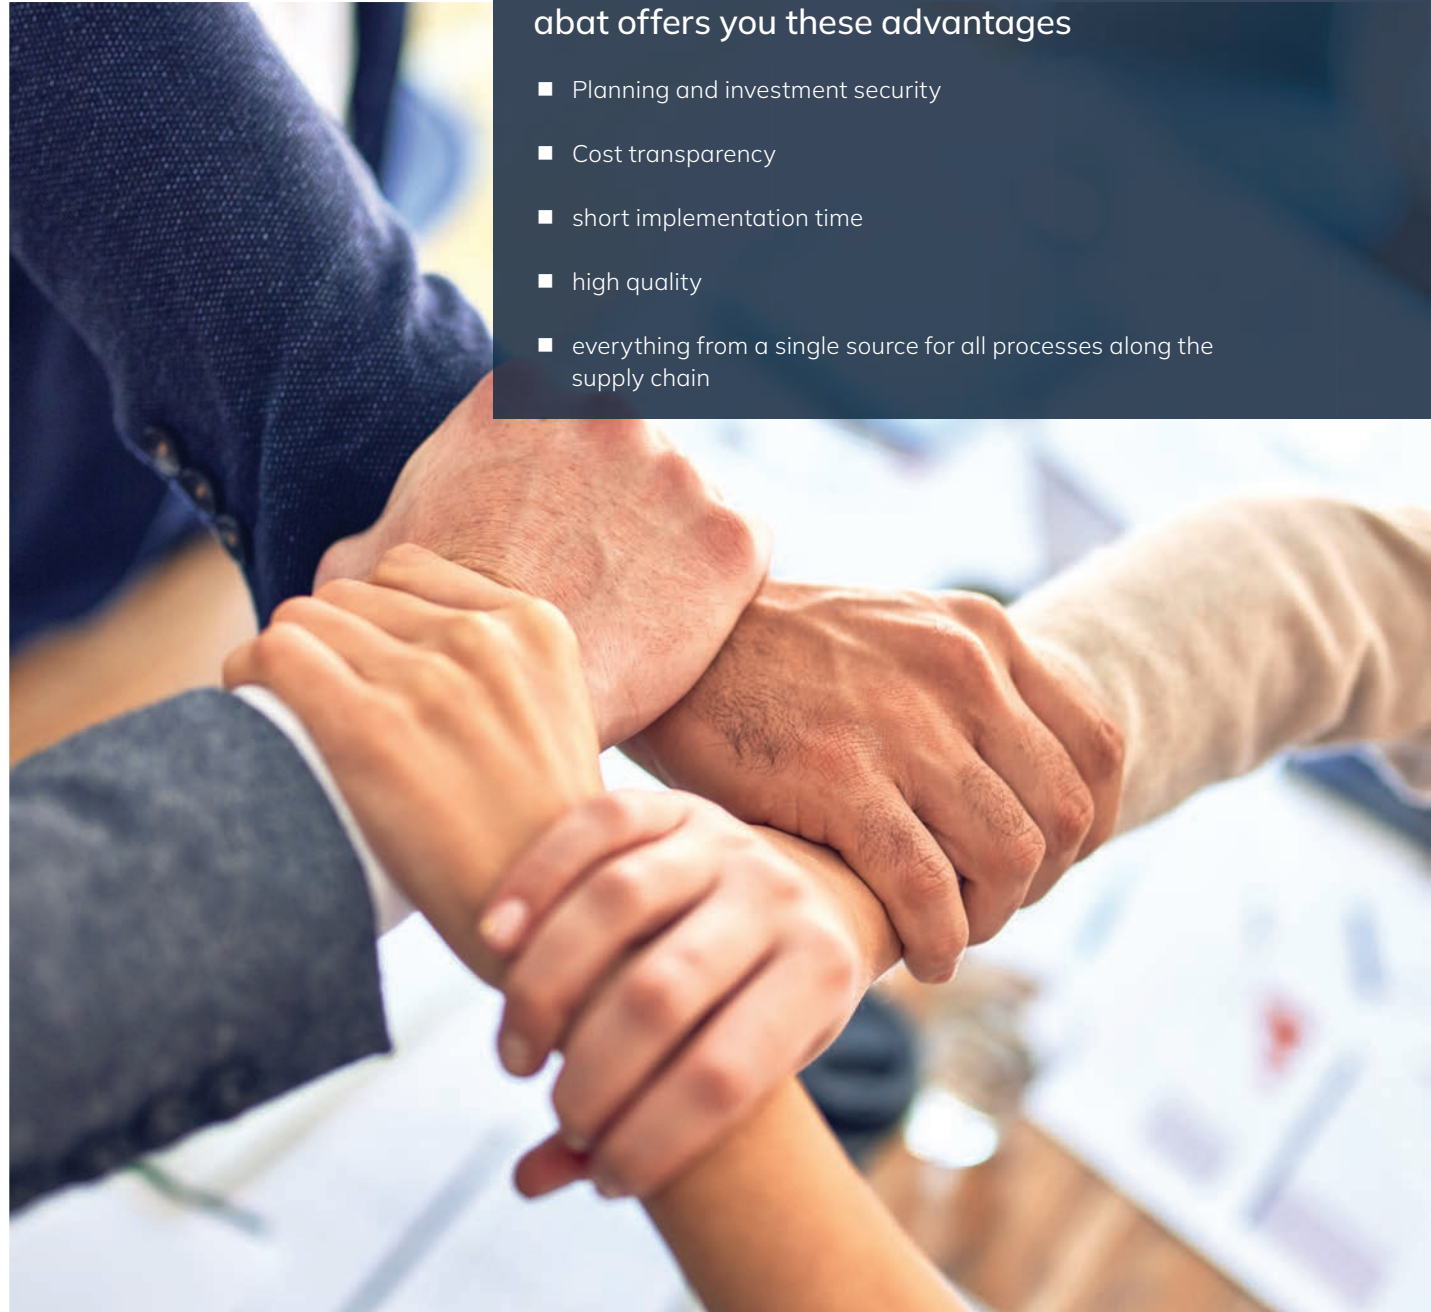

Optimal logistics processes are required in order to deliver sufficient quantities of Service Parts on time and to the right place. SAP SPM supports these processes across different logistics levels of the aftermarket.

### ■ **Automotive Production**

Hedging and scaling of the SAP production environments at the level of logistics and shop floor (Manufacturing Execution Systems).

## abat offers you these advantages

- Planning and investment security
- Cost transparency
- short implementation time
- high quality
- everything from a single source for all processes along the supply chain

## ABOUT US

# abat

The abat Group, founded in 1998, is an SAP service provider, innovative software developer and provider of complete solutions for software-supported process optimization –

primarily in the core industries of automotive and discrete manufacturing as well as in logistics processes and production control. With our six service areas, we give companies the freedom they need for new ideas, efficient processes, and future-oriented solutions.

In the **consulting** service area, we advise and support you in all phases of an SAP project – from conception to implementation to operation of your SAP system. With abat **manufacture**, you receive digital, high-availability solutions for production control in the complex manufacturing industry. With abat **transform** we offer you innovative and unique solutions that make you special: from AI to cloud to X-Reality. The **PLM** area offers comprehensive process consulting with the goal of achieving a continuous data flow across PLM, ERP and MES. Offerings from the **protect** area help customers secure information and maintain the confidentiality, availability, and integrity of business relationships. Finally, our **sustain** experts advise on how sustainability and CSR reporting can be strategically and structurally anchored in the company.
