

SAP Signavio - permanent X-ray view of your SAP system for organization-wide business process optimization

Knowledge of business processes is crucial to increase efficiency, ensure Quality standards, minimize risks, promote innovation and improve customer satisfaction. The SAP Signavio Process Transformation Suite helps you to analyze, manage and optimize your business processes in depth.

What are the benefits of SAP Signavio?

- You design and accelerate your S/4HANA transformation
- You can establish faster release cycles and calmly deal with market changes by using process visualization as the basis for your test and development work management
- Data-driven insights provide you with automated benchmarks and concrete recommendations for action, thereby improving performance and efficiency of your processes
- You receive reverse engineered process models
- Decisions can be made on the basis of facts instead of assumptions and targets are automatically compared
- Proactive intervention supports the early diagnosis of problems or deviations in your business processes
- The documentation corresponds to compliance

How to get the full picture together with abat

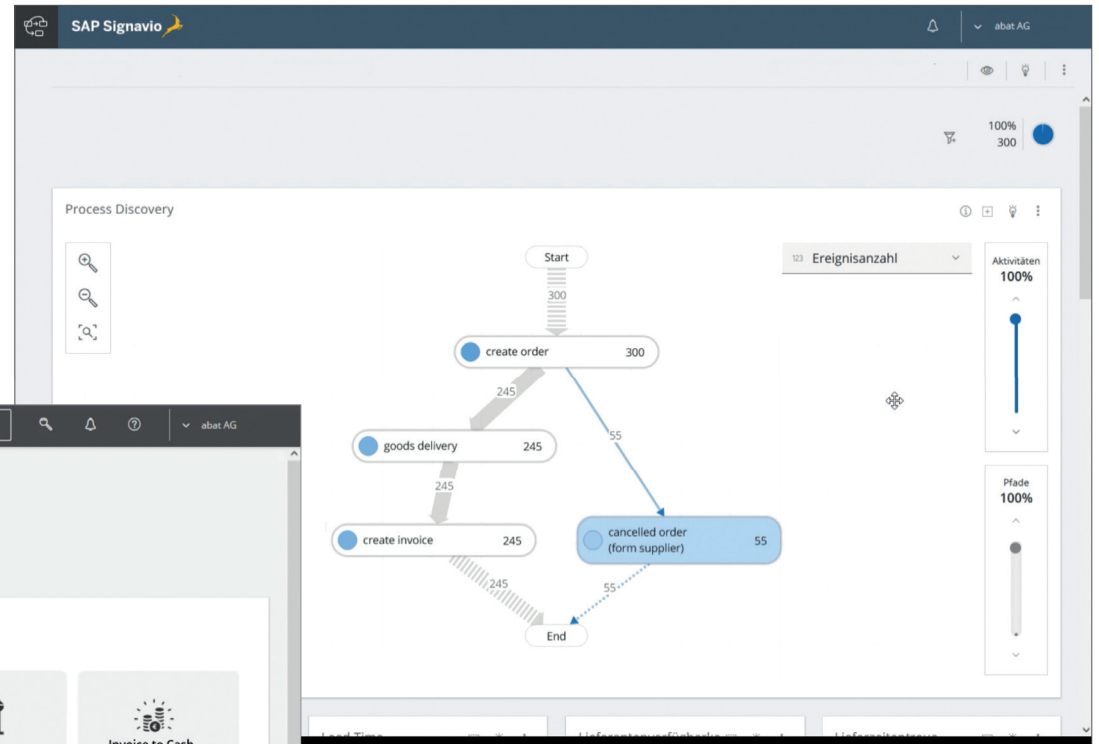

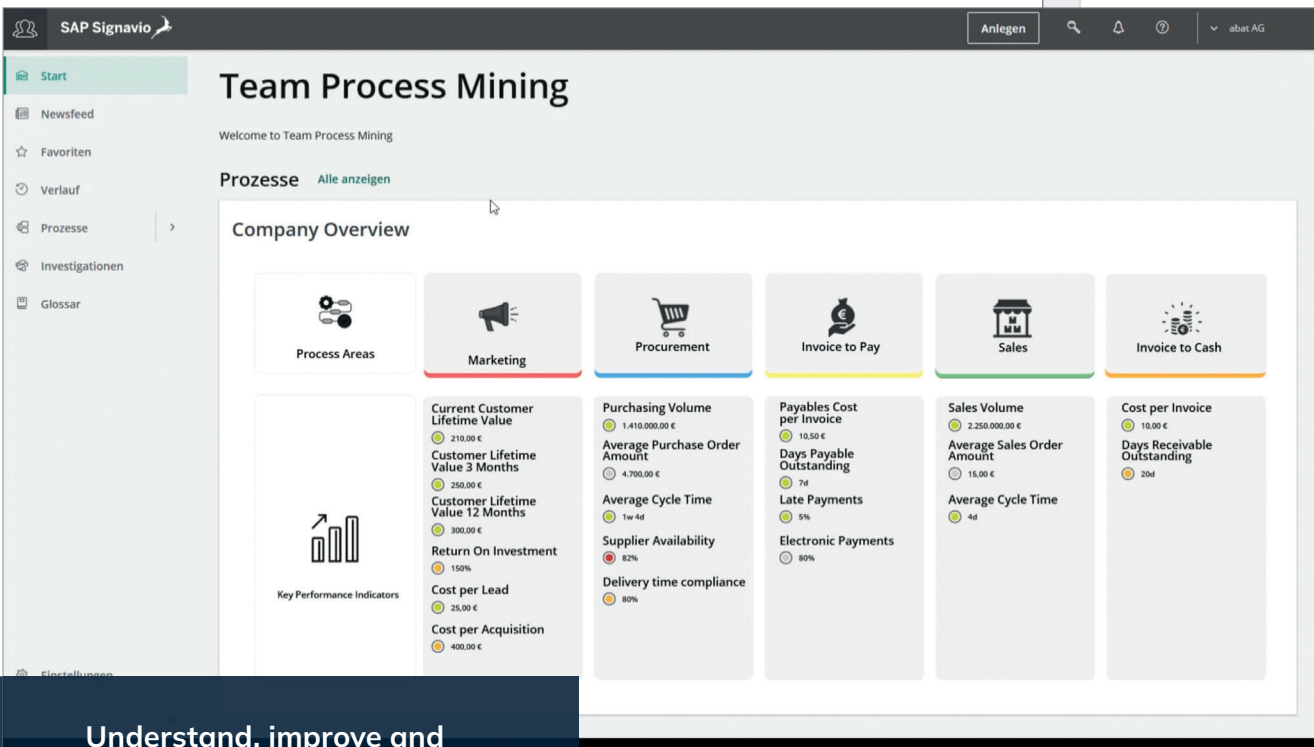

- Initial workshop - access to the components of the SAP Signavio Process Transformation Suite that are relevant for you
- Direct quick access with the help of Process Insights, with immediate added value and recommended actions for your SAP system
- Accelerate your S/4HANA transformation by quickly understanding how your business processes currently work and deciding what you need to do and what should be changed
- Support with the visualization and documentation of your business processes
- Creation of customer-specific process performance indicators (PPIs)
- Establishment of a future-proof company status:
 - Continuous analysis and optimization of your business processes
 - Documented processes for greater security and faster release cycles
 - Single point of truth for your company's processes
