SAP Solution Manager 7.2

Innovative all-rounder for your SAP environment

SAP Solution Manager - activate your IT potential

SAP Solution Manager is the ERP system for your company's IT. As a central platform, it offers the right application for a wide range of requirements at all times.

Certified in accordance with ITIL, SAP Solution Manager can also be used by SOX-compliant companies without hesitation. It is not only suitable for large corporations, but numerous smaller companies are also already benefiting from the advantages of this mature solution. SAP customers have the advantage that SAP Solution Manager does not require additional licensing.
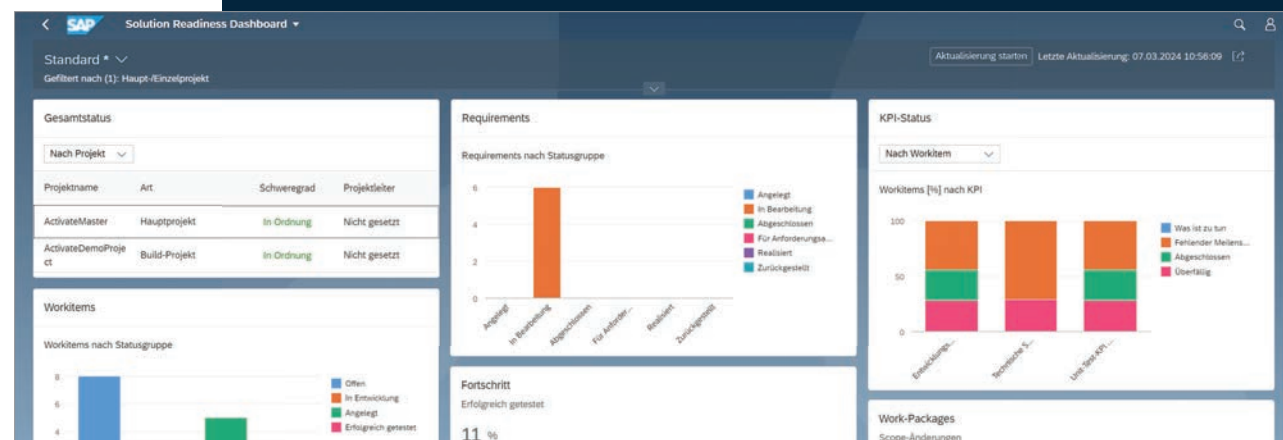

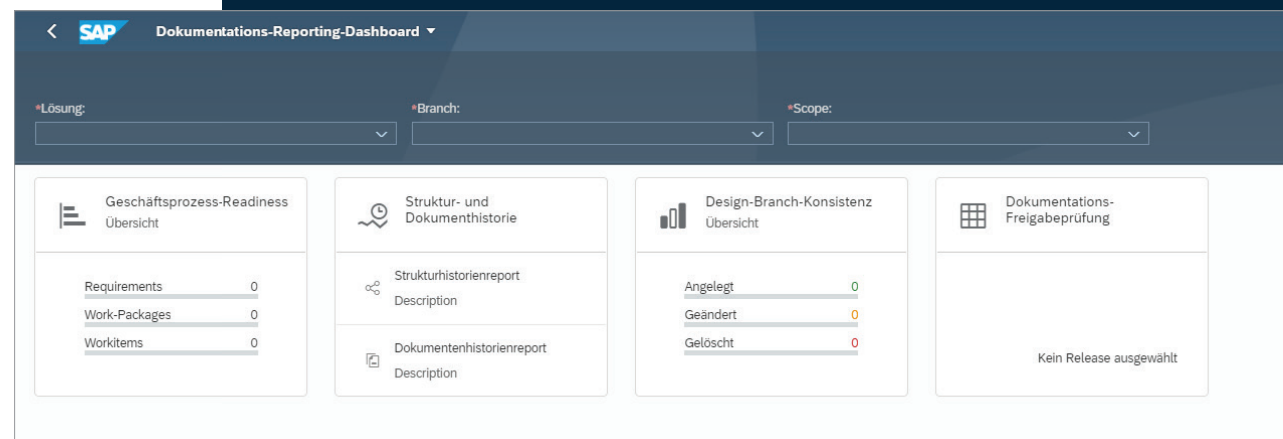

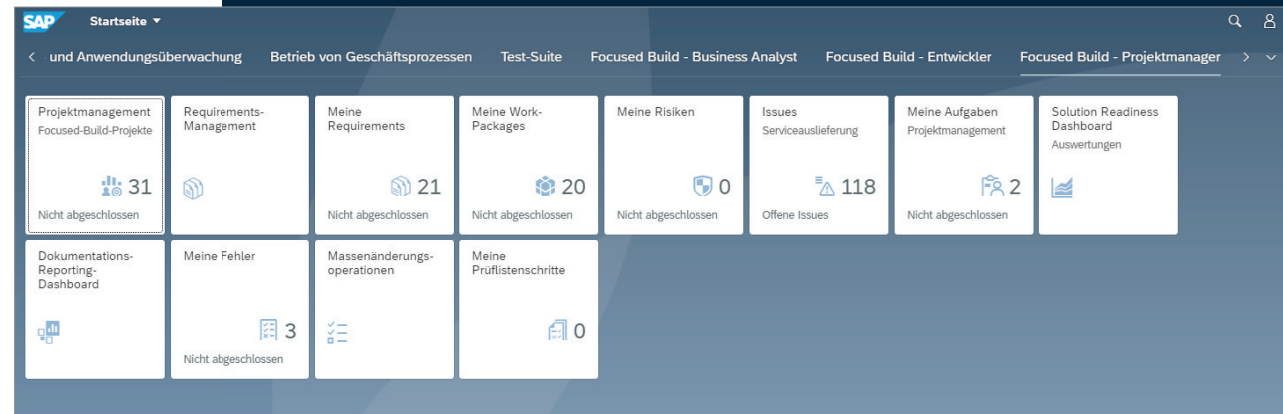

We will be happy to provide you with further information on the subject of licenses and support you in your decision-making process at any time. Please request our white paper for further details on the individual applications and their benefits.

Holistic concepts in SAP Solution Manager 7.2

Almost all applications are now web-based in the Fiori Launchpad. The SAP Solution Manager helps you to support the entire lifecycle of SAP applications, from implementation to continuous improvement. In short, it supports you with

- the management of requirements,

- the configuration of systems,

- the mapping, management and optimization of business processes,

- Test management,

- Monitoring,

- troubleshooting and optimization of SAP solutions.

SAP Solution Manager is often also used as a project management tool. SAP Activate provides the framework and methods for the implementation of SAP solutions and is used as an agile project management method to support you holistically in the tool in your day-to-day project work. Focused Build is an extension of SAP Solution Manager and focuses on supporting the entire lifecycle from requirements definition to the implementation of business processes. Focused Build uses the structure of SAP Activate to focus on business processes and offers special functions for requirements management, test management and change request management as well as various tools and overviews for project evaluation.

Get to know the applications with the respective top 3 benefits in our white paper! We would be happy to arrange an appointment with you to get to know and analyze your SAP Solution Manager.

ABOUT US

abat

The abat Group, founded in 1998, is an SAP service provider, innovative software developer and provider of complete solutions for software-supported process optimization – primarily in the core industries of automotive and discrete manufacturing as well as in logistics processes and production control. With our six service areas, we give companies the freedom they need for new ideas, efficient processes, and future-oriented solutions.

In the **consulting** service area, we advise and support you in all phases of an SAP project – from conception to implementation to operation of your SAP system. With abat **manufacture**, you receive digital, high-availability solutions for production control in the complex manufacturing industry. With abat **transform** we offer you innovative and unique solutions that make you special: from AI to cloud to X-Reality. The **PLM** area offers comprehensive process consulting with the goal of achieving a continuous data flow across PLM, ERP and MES. Offerings from the **protect** area help customers secure information and maintain the confidentiality, availability, and integrity of business relationships. Finally, our **sustain** experts advise on how sustainability and CSR reporting can be strategically and structurally anchored in the company.
