SAP TM - Optimize your transportation management

Making supply chains resilient and cost-efficient

The complete solution for integrated transport processes

Make your logistics future-proof with SAP Transportation Management! Integrate your transportation logistics seamlessly into your other business processes. From order integration, transportation planning and execution to freight cost management - SAP TM includes all transportation-relevant core processes and offers standard-integration with other SAP components such as SAP EWM or SAP FI/CO.

abat Add-Ons for SAP Transportation Management

PTV xServer Business Connector for SAP provides geocoding, map display, distance calculation and address verification in SAP TM without major integration effort.

TM-ON-STREET offers real-time data exchange between the driver and SAP TM during transportation: this allows you to track and control your current route planning and react quickly to unexpected events.

aLA – The abat Logistics Applications support the collaboration of the participants in your supply chain. We offer a range of applications, from the creation of transportation requirements to loading and invoicing. Preconfigured reporting applications are also part of our solution portfolio.

Simple integration of other SAP components

- **SAP BNL:** For collaboration in your logistics network via a central cloud-based platform
- **SAP EWM:** For the flexible design of warehouse processes - before and after transportation execution
- **SAP EH&S:** To support all tasks in occupational health and safety and environmental protection (e.g. dangerous goods checks and creation of dangerous goods documents)
- **SAP EM:** For visualizing process and performance data, initiating follow-up actions and alarms in critical situations
- **SAP GTS:** For compliance with international import and export regulations
- **SAP Standard Mobile Solutions:** For analyzing your transports (e.g. Fiori apps for tablets, smartphones and mobile devices)

ABOUT US

abat

The abat Group, founded in 1998, is an SAP service provider, innovative software developer and provider of complete solutions for software-supported process optimization –

primarily in the core industries of automotive and discrete manufacturing as well as in logistics processes and production control. With our six service areas, we give companies the freedom they need for new ideas, efficient processes, and future-oriented solutions.

In the **consulting** service area, we advise and support you in all phases of an SAP project – from conception to implementation to operation of your SAP system. With abat **manufacture**, you receive digital, high-availability solutions for production control in the complex manufacturing industry. With abat **transform** we offer you innovative and unique solutions that make you special: from AI to cloud to X-Reality. The **PLM** area offers comprehensive process consulting with the goal of achieving a continuous data flow across PLM, ERP and MES. Offerings from the **protect** area help customers secure information and maintain the confidentiality, availability, and integrity of business relationships. Finally, our **sustain** experts advise on how sustainability and CSR reporting can be strategically and structurally anchored in the company.
